

Thank's for your's Generous Donation

We

greatly appreciate for the raised funds by the ‘Small World’ team and by the UAE’s Red Crescent.

We would like to say thank you to the ‘Small World’ and to the Diamond sponsor MUBADALA, as well as the event’s sponsors to DU, to TAQA, to Higher Colleges of Technology, to Union National Bank, to CATALYST and FORESIGHT for the generous support and donation in the name of the disabled Hungarian children and the staff of the International Pető Institute.

With your support we had been able to help multiply disadvantaged, hard-fated families, the majority of whom have many children, are struck by unemployment and live in deep poverty, in such a way that your donation had been used for settling their debts. Thus we could have the opportunity to make almost 20 families’ lives easier and to share their financial burden. Now we are taking care about 275 disabled children.

As the sole holder of Pető’s legacy, the Institute is the international knowledge and resource centre of conductive education for the whole world. It also serves as the centre of quality assurance and provides accreditation services. The conductive pedagogical method for developing individuals with motor disabilities is world-renowned. Compared to other methods, it has been proved that at least one third of persons with central nervous disorders make better progress with conductive education.

The dedicated work of the International Pető Institute attracts continuous attention.

In addition to the great number of professional guests, members of royal houses, celebrities, politicians and their spouses have highlighted the cause of motor disorders by visiting the intellectual centre of conductive education.

We truly believe that Small World team’s great work will encourage more sponsors and donors to help them further in the future and helping us in return.
